

# Green industrial skills for sustainable development

- Skills competitions
- Projects
- Networking
- Research

## Skills competitions

*We already know that skills competitions*

- are a powerful tool in VET pedagogy to increase quality and keep up with enterprise development and meet future demands!
- provide schools with benchmarks on standards
- are national and international platforms for experience exchange and networking
- gives an opportunity to launch new skills!

*To develop skills definitions and skills standards which meet demands from the industry sector from a sustainability and “greening” point of view is one of the core strategies within WorldSkills.*

## Projects: WorldSkills Innovation Labs

- Green Plumbing; a water sanitation project, Nepal. Partner Health Habitat, Australia
- Development of a 3D Virtual Reality tool for Floristry teaching, learning and communication, Partner ITE, Singapore.
- “Small-smart-simple” projects to re-use test projects and waste materials after WSC2013 in Leipzig. Partner WorldSkills Leipzig 2013

## Projects: Networking and experience exchange

- A 4-week training course for VET leaders. Partner SENAI, Brazil.
- WorldSkills Leaders Forum; a top leaders meeting during the WorldSkills Competition
- A number of side meetings connecting leaders and experts from member countries

## Research

*“WorldSkills Competitions raise quality, promote professional development and drive improvements in vocational training.”*
